Investment Risk

There are significant risks associated with investment in the Fund outlined in the site. Investment in the unregulated scheme on this site is intended for sophisticated investors who can accept the risks associated with such an investment including a substantial or complete loss of their investment. Such schemes are permitted to and use gearing as an investment strategy. The effect of such gearing is that movements in the price of the schemes may be more volatile than the movements in the prices of their underlying investments.

Past performance is not a guide to future performance. The value of investments and any income derived from them can go down as well as up and the value of an investor's investment may be extremely volatile and be subject to sudden and substantial falls. Certain investment positions may be illiquid.

Income from investments may fluctuate. Changes in rates of exchange may have an adverse effect on the value, price or income of investments.

The foregoing list of risk factors is not complete and reference should be made to the relevant Prospectus.
