

The Anavon Global Equity Long Short UCITS Fund, a sub fund of Tages International Funds SICAV is a global long/short equity fund. The Fund's objective is to achieve superior absolute risk-adjusted returns over the long term. The strategy is biased towards developed markets and analysable sectors with a focus on liquid, large or mid cap stocks. Anavon employs deep fundamental research to seek out individual long and short opportunities while leveraging the manager's experience across the capital structure. The long portfolio targets high quality businesses with secular growth and competitive advantage where the share price is highly dislocated. The short portfolio seeks to position low quality businesses with structural challenges where the share price is overhyped. The strategy is designed to protect capital during downturns and capture equity market upside during upturns with a strong focus on risk management.

### Monthly Commentary

The Anavon Global Long/Short strategy returned 0.28% net of fees in July, compared to 0.2% for the MSCI ACW Index. Gains from our long investments more than offset a small loss from our shorts. It has been a relatively eventful results season, with some of our positions reacting very sharply. Overall, results were supportive of our investment theses with some exceptions.

The Fund's long book contributed 0.6% to performance, slightly outperforming the global average. The largest positive contributors in the month were **AMS** and **Philips**. Shares in AMS rallied 35% in July on the back of very strong quarterly results which demonstrated that the company continues to perform in line with our bullish thesis as business from Apple remains steady and the company continues to make significant progress with Android OEMs. Philips shares rose 11% in July following strong Q2 results. The company reported organic growth in excess of 6%, its strongest performance in several years. The largest detractors were **Chemours** and **EA** (Electronics Arts). Shares in Chemours drifted 19% lower on fears of ballooning environmental liabilities, which we believe to be overblown. Trading on less than 5x earnings, the shares represent a compelling asymmetric investment proposition.

The Fund's short investments detracted c. 0.1% from gross performance in the month. The largest positive contributors were **Align Technology** and **Maire Tecnimont**. Shares in Align fell 24% in July on the back of weak Q2 numbers and even weaker Q3 guidance. Our short thesis, which centres on emerging competition, is playing out in full force. Competition is forcing Align to cut prices to prevent market share losses.
